

Will I perform better on the ACT or SAT?

Find out by taking this short quiz!

Read each statement and mark whether you *agree* with the statement, *disagree* with the statement, or are *unsure* whether the statement describes you. Try to select *agree* or *disagree* as much as possible; think in terms of what *mostly* describes you and avoid over-analyzing yourself.

Statement:	Agree	Unsure	Disagree
1. I have essential math formulas memorized.			
2. I struggle with high level vocabulary.			
3. Math is NOT one of my strong areas.			
4. I enjoy and I excel at science.			
5. I struggle to find textual evidence for my answers.			
6. I prefer all questions to be multiple-choice.			
7. I need a calculator for most calculations.			
8. I am great at reading charts and graphs.			
9. I work accurately and calmly under time pressure.			
10. Critical thinking is difficult for me.			

If you mostly marked that you *agree* with the statements, ACT is most likely to be the test you perform better on. If you mostly marked that you disagree with the statements, SAT is most likely to be the test you perform better on.

Note that this is a quiz of generalizations and only provides an initial indication of which test is best for you. The most accurate way to determine which test you will score highest on is to take both tests and see how you score!
